

TA meeting

19 Jun 2023

- Last week's retrospective
 - Migrate db from mongo to postgres - vlad, rares
 - Statistics part for the main page - cristi, matei
 - Failed to enable persisting documents using a queue - matei
 - Display 10 articles - diana
 - Let the user decide the sensitivity for the minimum acceptable similarity score - matei
- Demo time
- No proper solution to the number of users who accessed the platform
- This week's schedule
- Deadline code = deadline report
- feedback report = good (excellent?)
- Visualisations -> it's great to have images with the app, we could add visual representations of the design patterns we have implemented
- We must remove a line from a backend test/implementation which breaks the generation of the git inspector.
- Readme
 - Info how to set up the application
 - Example usage
 - 2-3 screenshots with the app or a short video on how to use the app
 - License - copyright by tudelft and sourcer
 - Reference to scripts.md, troubleshooting.md
- Report => looks good to Codrin
- **Meeting Codrin: 28th of June at 18:00**
- Codrin recommends us to reserve one entire day to re-read the entire report and make the required changes.
