Agenda items

- Finished Sprint 4, currently within Sprint 5.
- Change `published date` to `retrieved date`
- Cookies accept in render page throws error.
- Maybe highlight in render check text.
- Progress bar improvements => bold text in the progress bar (maybe make the background more transparent).
- Optimise for rubrics (look at rubric for product and report).
- Pipeline for `cypress` integration tests => OK for merge from dev to main.
- Try to use caching for pipeline (e.g., cache dependencies installed with `npm install`).
- Codrin started writing stuff for the final report in week 8.
- Use code quality metrics tools!!!
- Maybe think of possible questions that might come up in the Q&A, cut some content from the presentation, to expect to answer the questions with the content.
- Answer questions with confidence in Q&A after final presentation.
- Ask client for what languages they use.
- Team contribution is much better and balanced.
- Next chair: Rares, next minute taker: Diana.
- Message Codrin week 9 and week 10 online meetings.
