Summary of action points

- Remember to send the project plan over email to our Coach after we have our final version, so she will be able to look at it before our meeting in Week 3.
- Adding “won’t haves” to our requirement list would be a good thing.
- Maybe add NoSQL vs relational DBs to the problem analysis/research section.
- Will likely store the date as a separate field.
- Double-check that we correctly cite our sources.
- Wrap up the project plan and code of conduct, deadline is Thursday.

Opening by Chairperson

➔ Everybody is present at the meeting.
